Dear Dr. Henney,
I am writing to express my concern over the FDA's regulation of genetically engineered (GE) food. I request that the agency's NOV current policies be changed, and I support all the points in docket #00P\_1211 GP1

All GE foods should be labeled so I am informed and have a choice.

☑GE foods should not be assumed to be "generally recognized as safe" and should have mandatory pre-market safety testing

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

☐ There should be a moratorium on GE foods until long-term studies show they are safe for human health and the environment.

(Additional Personal Comments:) As a professional environmental engineer I am particularly concerned about the long-term environmental affects of cross-garmination of GE foods.
